-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

## DETAILED ACTION

### *Election/Restrictions*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-23, 62 and 63 drawn to a digital camera comprising a display that displays feature point information identifying the feature point selected by the selecting means, classified in class 348, subclass 333.01.
  - II. Claims 24-32, drawn to drawn to a digital camera comprising a zooming means that zooms in/out a given area including the feature point corresponding to the size of the feature point, classified in class 348, subclass 240.99.
  - III. Claims 33-40, drawn to a drawn to a digital camera comprising a warning means that warns in accordance with a discrimination based on a eye shake is classified in class 348, subclass 333.04.
  - IV. Claims 41-47 and 59-61 drawn to a digital camera comprising a memory that stores color reproduction parameters and color reproduction according to skin color is classified in class 348, subclass 229.1.
  - V. Claims 48-52, drawn to a digital camera comprising an AF means that controls focusing is classified in class 348, subclass 345.
  - VI. Claims 53-58, drawn to a digital camera comprising an illumination means is classified in class 348, subclass 371.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as subcombinations disclosed as usable together in

Art Unit: 2622

a single combination. The subcombinations are distinct if they do not overlap in scope and are not obvious variants, and if it is shown that at least one subcombination is separately usable. In the instant case, subcombination I has separate utility such as in an image compression apparatus that does not input images at a predetermined interval. Inventions I and III are related as subcombinations disclosed as usable together in a single combination.

Subcombination I has separate utility such as in an image compression apparatus that does not receive a capture designation signal. Inventions I and IV are related as subcombinations disclosed as usable together in a single combination.

Subcombination I has separate utility such as in an image compression apparatus that does not transmit image data. Inventions I and VI are related as subcombinations disclosed as usable together in a single combination.

Subcombination I has separate utility such as in an image compression apparatus that does not regenerate compressed image data. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

2. Applicant is advised that a reply to this requirement must include an identification of the group that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added.

An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Art Unit: 2622

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.
